# Mo's 2 Cents

In this edition of Mo's 2 Cents, I'm taking a closer look at one of this season's most sought-after gift ideas: CU6338 Bluetooth® Subwoofer Speaker.

Mo Plamondon, Silver Fox Marketing  
Alberta Sales Rep.

Bluetooth® technology continues to be the biggest player in wireless connectivity. With the ability to be linked to almost all Apple products and other smart devices, we have seen a massive swell in the demand for Bluetooth® accessories. At Debco, we're making our own "sound waves" this season with the announcement of our portable, rechargeable and completely WIRELESS Bluetooth® Subwoofer Speaker!

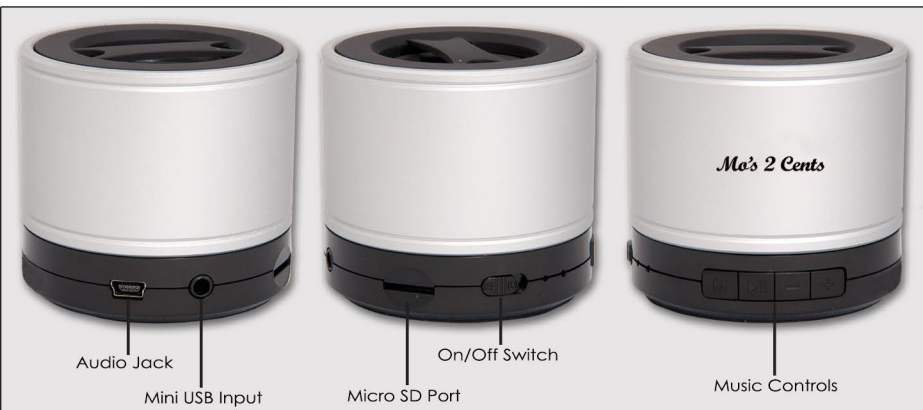

The CU6338 is acoustically built for superior sound whether it's used around the home, in the office, or as a travel accessory. With a range of listening and operational options, versatility is the cornerstone of this product. Simply plug in your headphones for a more intimate sound experience, or go completely wireless and take advantage of the extra loud bass effect. You may also want to use it to add an extra boost of sound to your weekly conference calls. Simply link your CU6338 speaker with your phone and enjoy crystal clear speakerphone clarity!

But wait! It's more than just a speaker; it can also play music directly from your Micro SD card. Simply plug your Micro SD card into a slot on the speaker and it will play mp3/wma music files without a Bluetooth® enabled device.

Your clients will be amazed at the sound of this relatively tiny speaker, and how easily it can be adapted for everyday use.

Are you interested in learning more? Let's talk about how you can implement this trendy new item into your mix, as one of this season's must-have gift ideas!

Until next time, this has been my 2 cents!
