

WATER BOTTLES

Resourceful, Reliable, Reusable, Recyclable

Think back five, ten, twenty, and thirty years. Consider a normal day, either at work or at play. Now, give some thought to whether you had a water bottle with you. If so, try and remember the size, shape, and material of the water bottle. Can you recall some of the older styles? Can you remember an era when you didn't even keep a personal water bottle with you? Indeed, an interesting and revealing exercise, especially as you look further back in time.

Fast forward to today. It is a different world – most certainly one of tremendous choice. Look around now, or consider your own situation, and you'll notice that almost everybody is carrying or using a personal drinking container. The styles, shapes, sizes, and materials are as varied as the people that enjoy drinking from them. Debcó offers a wide selection of bottles to meet the needs and tastes of all that enjoy using one. As with many of Debcó's product categories, beverage containers are constantly evolving and improving.

Overall, not including products suitable for hot drinks, Debcó currently offers sixteen different bottles. Beyond that selection, is an equally varied array of bottle accessories. Debcó offers carabineers with bottle holders (such as the M3692), sling knapsacks, tote bags (like the new NW8013), fanny packs, and gift sets to complement its assortment of water bottles. Thanks to the many vehicles, carrying a bottle could not be easier! Whether young, old, or in between, hydration is of great importance to people of all ages. When drinking water is more accessible, personal health is most definitely improved.

For those preferring to drink from a metal container, several styles are available in both stainless steel and aluminum. Debcó's popular WB8015 stainless steel bottle, unique due to its 800ml size and generous wide mouth opening, is one recent addition. The aluminum collection has grown in both colours and styles, including the very fashionable WB4939 that offers a distinctive two-tone finish and rubber grip. Whether small, large, or larger still, there are plenty of bottle sizes to complement the varied looks.

If an approved BPA free plastic bottle is the material of choice then, like the metal bottles, Debcó has plenty of styles to choose from. The recent addition of the already popular WB7196, dramatically changes the reusable plastic bottle landscape – both literally and figuratively. The new clear plastic bottle, available with a choice of five lid colours, is not only safe, but is completely recyclable at the end of its usefulness. The new WB7196 is clearly a unique solution for disposable water bottles. If a larger bottles are desired, then styles such as Debcó's WB4778 and WB7026 may be the perfect solutions.

Beyond the wide selection, tremendous value, and inventory integrity of Debcó's water bottle collection, every choice is in some way environmentally positive. Today, an increased eco-consciousness prevails in the global marketplace. Debcó places great importance in offering reusable water bottle solutions that fit within its overall philosophy of ecological corporate sustainability.
